Biography For Javeed Siddiqui M.D., M.P.H

Dr. Javeed Siddiqui is the co-founder and Chief Medical Officer for TeleMed2U.

In addition to being an Infectious Diseases physician, Dr. Siddiqui is a recognized medical technologist who has previously held an appointment at the School of Engineering, University of California, Berkeley.

Dr. Siddiqui has been actively involved in telemedicine and telehealth since 2002 and has been recognized as a national thought leader in these fields. Dr. Siddiqui served as the Medical Director of one the nation’s top telemedicine programs at the University of California, Davis.

In addition, Dr. Siddiqui was the first Medical Director of California’s Institute for Science and Innovation, The Center for Information Technology Research in the Interest of Society [CITRIS].

Dr. Siddiqui co-founded TeleMed2U in 2010.

TeleMed2U is a multi-specialty medical practice that is 100% telemedicine based. In addition, TeleMed2U is breaking new ground in the application of telemedicine and telehealth in the field of healthcare reform.

TeleMed2U has pioneered work in developing and implementing telemedicine services and programs to hospitals and outpatient clinics. In 2012 the Agency for Healthcare Research and Quality recognized the telemedicine based anti-microbial stewardship program developed by TeleMed2U at Sonoma Valley Hospital (SVH) as an innovative program in health care.

TeleMed2U is designed to provide a win/win proposition for the entire health care supply chain including physicians, patients, hospitals and insurance companies.

Telemedicine and TeleMed2U will play a key role in healthcare reform in increasing access to care, changing the environment of healthcare delivery and reducing the per capita cost.
