Adaora Adimora, MD, MPH. Dr. Adimora is Professor of Medicine and Epidemiology at the University of North Carolina at Chapel Hill. Board certified in Internal Medicine and Infectious Diseases, she is a physician epidemiologist with more than 20 years of clinical experience in the treatment of patients with HIV disease. She studies the epidemiology of HIV and STIs. Her work has characterized the epidemiology of heterosexual HIV transmission among African Americans, highlighted the role of sexual network patterns in the spread of HIV, and underscored the importance of macroeconomic and social forces in racial disparities in the US HIV epidemic. While her research focuses on the domestic HIV epidemic, she has also served as the PI and led the NIH-funded UNC Fogarty AIDS International Training and Research Program. She serves as Chair of the HIV Medical Association, chairs the NIH HIV Prevention Trials Network’s Women at Risk Committee, and is a member of the Women’s Research Initiative on HIV/AIDS, the NIAID Council, and the Presidential Advisory Council on HIV/AIDS.
